

Hi Sir,

Hope you are doing good!

Dr. Sachin has expressed interest in studying SNPs associated with plasticity (TMS response) genes, particularly in patients with stroke and Parkinson's disease, and in assessing whether these SNPs are covered in our exome sequencing data.

I have attached the list of SNPs and the corresponding genes for your reference. The genes highlighted in red indicate TMS-responsive genes. It would be helpful to discuss how we can take this work forward and plan the next steps.

Genes	SNP
BDNF	rs6265 (Val66Met)
COMT	Val158Met
TRPV1	rs222747
DRD2	957C>T,
DRD3	rs6280
SLC6A4	5-HTTLPR (s/l alleles)
HTR1A	rs6295
HTR2A	rs6311, rs6313
NTRK2(TrkB)	rs2289656
GRIN2B	rs1805247
GRIN1	rs4880213 T/T,
GRN	g.1977_1980delCACT, IVS6+5_8delGTGA
APOE	ε2 / ε3 / ε4
ACE	I / D
SNCA	A53T / A30P / E46K
LRRK2	G2019S / R1441C / R1441G / R1628P
PARK2	Exon deletions / P153R / R275W
PINK1	Q267X / F385S / L347P
DJ-1	L166P / M26I / E64D
GBA	N370S / L444P / E326K
VPS35	D620N
MAPT	H1 / H2 haplotypes
NOS3	rs1799983
MTHFR	C677T / A1298C
IL6	rs1800795

TNF-α	rs1800629
ACE2	rs4646156
